Mr Ian Kindler
New York

Dear Mr Kindler,

Enclosed the 10 centimes coil about which we had some correspondance a few months back. I just received it.

Also a few odds and ends from the special booklets. Believe it or not, they are not very common in cancelled condition.

I must congratulate you upon your article in Linn's. It is well written and to the point. I feel quite elated if in some small way I have influenced you in specializing the 10 centimes. It is one of the most interesting stamps in the French Collection.

I also want to thank you for mentioning my name or my Catalogue rather in your article. I am very proud of this work, and I have been honored with very complimentary reviews in France and in Great Britain, but nobody hardly ever mentions it here, although it is quite widely used. "Nul n'est prophete en son pays".

If the enclosed stamps do not interest you, you are of course at liberty to return them all or in part.

Very sincerely yours

Raoul Lesgor
